

With Sodium hyaluronate and lactic acid

Premeno[®] duo

Vaginal ovules for vaginal dryness

The hormone free medical device Premeno[®] duo is the first ovule that both regulates the moisture balance of the vagina and restores the natural pH for defence against infections.

Indication:

Vaginal dryness – caused by:

- The menopause
- The breastfeeding
- Use of hormonal contraceptives
- Use of drugs that influence the body's natural estrogen production
- Psychological factors (e.g. stress)
- Cancer treatment (chemotherapy/radiotherapy)
- Frequently occurring fungal infections

Typical symptoms of vaginal dryness:

- Burning
- Itching
- Pain during intercourse
- Pronounced feeling of vaginal dryness

Use:

- **For the treatment and prevention of dry vaginal skin:**
1x daily to 1x every 3 days
- **For bacterial vaginal infections:**
Initial dose: one ovulum before bedtime for 10 days
Maintenance dose: one ovulum every 3rd day for as long as required

Properties:

- Hormone free
- Promotes wound healing
- Increases moisture
- Low side effect potential since nature-identical substances
- Free of preservatives
- Free of parabens
- Tasteless and odourless
- Free of additional plant based substances like tea-tree oil or aloe vera
- Obtainable from pharmacies and specialised dealerships

Ingredients:

- One ovulum contains 5mg sodium hyaluronate and a combination of lactic acid and sodium lactate
